Project Description		
Project Address		Lot
Subdivision	Parcel No.	Building Permit No.

A stormwater management fee is imposed on all developed property within the city for services and facilities provided by the stormwater management system. The fee for general properties is subject to adjustment from time to time in the event more impervious surface area is added to the parcel.

The stormwater user charge is used to pay for expenditures in capital projects and the operation and maintenance of stormwater facilities as a part of the Stormwater Management Program. Some examples of what the funds pay for include the repair or replacement of damaged drainage culverts and structures, the City's street sweeping program, and the maintenance and re-grading of retention pond and drainage swales. The fee also pays for periodic adjustments to manholes and inlets where surrounding soils have subsided. These programs are a result of Federal and State regulations.

The project you are proposing increases the impervious surface area on the subject parcel and the stormwater user fee must be adjusted accordingly.

**“IMPERVIOUS AREA.** That part of any parcel of land that has been modified which results in the reduction of the land’s natural ability to absorb and hold rainfall, including but not limited to any area which has been paved, filled, graveled or compacted, or covered with a structure. The term excludes uncovered areas such as lawns, landscape areas, gardens, or stormwater pond areas.”

In the space below, please provide Total New impervious surface area (*existing + proposed*), in square feet created because of the above-mentioned project.

Sq. ft.

### New/Proposed Total Impervious

I (We), the undersigned do hereby affirm that the information provided herein is true and accurate.
