Levis Cardboard	The formula	a for the 8yo	l cardboard	can is as follows	;		
	A yard of cardboard is roughly 26lbs, 26lbs x 8yds = 208lbs. x 2 a week = 416lbs. I can't say the can is totally ful						full every time,
	or is the boxes are broke down, or if its overloaded. (But this figure is just an average)
